Saturday, April 18, 2009

Presented by

Hear disease is the leading cause of death in Wisconsin. It kills one in three and touches virtually every family. More than 20 years ago, it touched Wisconsin native and New York Giants offensive lineman Rich Seubert's family. His grandmother Celine is alive today thanks to a heart transplant that was only possible because of pioneering cardiology research. To support further cardiology research and improve the lives of other families, Rich is hosting the premier celebrity shooting event. Join Rich and some of his teammates for a first-class day of fun for a great cause.
